Summary

Fullstack developer with 7+ years of experience building production-grade systems across backend, mobile, and web platforms. Proficient in Laravel, Node.js, Flutter, and Vue/Nuxt — with a consistent track record of improving performance and delivering measurable results across diverse domains including SaaS, healthcare, and edtech. Comfortable working across the full stack and across platforms. Currently expanding into AI engineering, with hands-on experience integrating and serving ML models in production and building LLM-powered features using OpenAI, Gemini, and Claude.

Experience

Directmail2.0 | Florida (Remote)

Fullstack Developer | 01/2024 - Present

- Collaborate to build LLM based chat bot that can analyze our published mail piece, im using langgraph to execute this
- Collaborate to build LLM based mail improvement
- Initiated build c4m app that allow user to scan their mailpiece
- Maintain and enhance existing applications, including backend and internal tools.
- Integrate systems with Google/Facebook Ads APIs and Zoho Billing for subscription workflows.
- Improve background processes and optimize application performance.
- Develop mobile apps using AI assistance tools without relying on UI/UX designers.
- Maintain multi-app architecture built using Node.js, Go, and PHP.

Tech: Node.js, Nest, Express, Nuxt, Go, PHP Laravel, AWS, Flutter

PT. Dinustek | Semarang, Jawa Tengah

Fullstack Developer | 09/2019 - 09/2025

- Built **Oncodoc AI Platform** end-to-end — developed the full frontend (Vue/Nuxt) and backend (Laravel), and integrated a Python-based AI model server built by the ML team using TensorFlow and ONNX into the main application.
- Built a mobile **attendance presence system** (Android & iOS) with face verification.
- Developed mobile and backend systems for **Oncodoc**, a rule-based cancer early-detection app using Flutter, Vue (Nuxt), and Laravel.
- Built **student admission apps** for kindergarten through junior high schools in Semarang, improving ranking and queuing processes using RabbitMQ (PHP).
- Developed an **employee management system**.

PT. Advomatrix Indonesia | Jakarta (Remote)

Fullstack Developer | 02/2022 - 02/2024

- Built Android application for doctor teleconsultation using Flutter, implementing video calls using Agora SDK.
- Integrated e-wallets, virtual accounts, and QRIS payments using Xendit.
- Developed backend services for Android apps using CodeIgniter, integrating with existing hospital information systems.

Tech: Flutter, Agora SDK, Xendit, CodeIgniter, MySQL, REST API.

PT. Insan Membangun Bangsa (Azura Labs) | Semarang, Jawa Tengah

Fullstack Developer | 12/2018 - 01/2022

- Built KPK Jaga.id frontend using Vue.js (Quasar).
- Developed hospital management and HR applications using Node.js and Vue.
- Built backend & mobile app for E-Learning system at Sultan Agung University (Node.js, React Native).

Tech: Vue.js, Quasar, Node.js, React Native, MySQL.

Education

Universitas Dian Nuswantoro | Semarang, Jawa Tengah

Computer Science | 03/2023

Graduated in 3.5 years with a 3.79 GPA

Skills

Node.js, Go, PHP, Python, Laravel, Express.js, NestJs, Vue, React.js, Flutter, Git, PostgreSQL, MySQL

Languages

Indonesian, English (Intermediate)

Community Involvement

- Flutter Training Speaker for Udinus lecturer
- Laravel Training Speaker for Udinus lecturer
- Practical Lecturer teaching Flutter for Udinus students
